About the demo

Datetime:
11 am, November 24th

Challenges:
Before the demo, during our rehearsal, we noticed a few faults in some corner cases of the app. One is about the login redirection when someone clicks on the invitation link. We took notes and fixed the routine then.

During the demo, IA gave advice on features that we didn't think about. She advises us to present hints when no rooms are available for a user, since the "creating a new group" button is not obvious. This makes a lot of sense, and we would refine it in the next iteration.
